

TIMOTHY J. McGUIRE

Senior / Principal Product Designer — AI, Agentic Systems & Design Systems
Barrington, IL | 773-724-0473 | godesigngo@gmail.com | LinkedIn

Professional Summary

Senior / Principal Product Designer with 15+ years of experience leading enterprise SaaS, AI-native products, healthcare platforms, FinTech solutions, and large-scale design systems. Specialized in Agentic AI UX, human-in-the-loop systems, LLM-powered experiences, design system governance, repository-driven source-of-truth strategies, and modern documentation platforms. Proven track record of improving usability, accelerating delivery, increasing adoption, and aligning user needs with business outcomes.

Core Competencies

Agentic AI • AI Product Design • Human-in-the-Loop Systems • LLM UX • Design Systems • Design Tokens • Figma Variables • Design System Governance • Documentation Platforms • Repository as Source of Truth • Enterprise SaaS • UX Strategy • UX/UI Product Design • User Research • Accessibility • Analytics & Data Visualization

Professional Experience

ZS Associates — Principal Product Designer / UX Lead (2017–Present)

- Led enterprise UX strategy across the Zaidyn healthcare SaaS ecosystem spanning 20+ products.
- Defined and executed Agentic AI UX strategy including AI-assisted workflows, human-in-the-loop controls, explainability, auditability, and responsible AI governance.
- Architected AI-native experiences leveraging LLMs, predictive analytics, recommendation engines, and workflow automation.
- Established enterprise Design System strategy using design tokens, Figma Variables, accessibility standards, and governance frameworks.
- Created a repository-driven Design System operating model positioning repositories as the single source of truth for design, engineering, documentation, and AI-enabled development.
- Led implementation of a modern documentation platform improving discoverability, onboarding efficiency, and adoption.
- Reduced design-to-development friction by 25–35% through alignment of design assets and engineering implementation.
- Reduced cognitive load and improved task efficiency by 30–40% across analytics-intensive healthcare workflows.
- Improved design system adoption by 50%+ while accelerating feature delivery and consistency.

Agate Software — Principal UX/UI Designer & Manager (2023–2025)

- Led end-to-end redesign of Atom Software and IGX enterprise SaaS platforms.
- Improved platform usability by approximately 30% through navigation, IA, and dashboard redesign.
- Introduced AI-assisted prototyping workflows using OpenAI, Claude, Figma Make, Bolt.new, and Lovable.
- Reduced design iteration cycles by approximately 35%.
- Established scalable UX standards and governance processes supporting modular product expansion.
- Reduced design handoff issues by 25% through improved collaboration workflows.

Bank of America — Senior UX/UI Designer (2023)

- Designed Auto Loans experiences aligned with business, compliance, and user needs.
- Improved workflow efficiency and team productivity by approximately 20%.
- Streamlined customer journeys contributing to estimated completion-rate improvements of 15–20%.

Gray Matter Analytics — Principal UX Designer

- Led redesign of CoreTechs healthcare analytics platform.
- Improved task efficiency by approximately 30% and accelerated future feature delivery by 20%.
- Established reusable healthcare UX patterns and scalable design standards.

TransUnion — Principal UX/UI Designer

- Led redesign of authenticated credit-reporting experiences and marketing platform.
- Improved conversion performance by 22% and outperformed control experiences in A/B testing by 15–22%.
- Improved comprehension of complex financial data through user-centered workflows.

Accenture — Senior UX/UI Designer

- Consolidated enterprise experiences into a unified framework.
- Improved workflow efficiency and reduced UX inconsistencies by approximately 25%.

Sapient Nitro — Lead UX/UI Designer

- Delivered enterprise platforms for Chrysler, Mopar, UConnect, CPS, and NHA.
- Improved usability and engagement metrics by an estimated 20–30%.

Education

University of Wisconsin–Madison — Bachelor of Science, Graphic Design & Fine Art
